

MUHAMMAD SHOAIB

SOFTWARE ENGINEER

Korangi Crossing, 75190 Karachi, Pakistan | +92 310-1210855 | shoaib.octachat@gmail.com

PROFESSIONAL SUMMARY

I'm a software engineer with 7 years of hands-on experience in creating modern web applications and delivering practical solutions that make an impact. Over the years, I've worked extensively with React JS, Next JS, AI Automations, and JavaScript frameworks to build responsive web and mobile apps. I enjoy collaborating with cross-functional teams to tackle complex requirements and bring ideas to life.

With a strong focus on troubleshooting and optimization, I make sure the applications I work on are not only functional but also perform at their best. I'm always eager to learn new technologies and explore innovative ways to improve user experience and overall functionality.

PROFESSIONAL EXPERIENCE

Frontend Engineer | Linkstar, Karachi

May 2022 — Present

- Worked to solve complex problems using modern Cloud, Mobile (React Native), and Web technologies.
- Developed and maintained AI-assisted coding workflows, dashboards, CRM platforms, internal tools, and modern web applications.
- Built responsive web and mobile applications using React, React Native, JavaScript, and related frontend technologies.
- Integrated REST APIs and third-party services, including authentication, data services, and external platform integrations.
- Worked on workflow automation and AI-powered features to improve business processes and reduce repetitive tasks.
- Provided effective troubleshooting, debugging, optimization, and remediation for web and mobile applications.
- Planned, developed, tested, deployed, and maintained web and mobile applications from development through production.
- Designed and developed responsive websites, dashboards, admin panels, CRM systems, and cross-platform mobile applications.
- Worked productively with the Product Team to understand requirements and business specifications around Portfolio Management, Analytics, Risk, and other business workflows.
- Collaborated with backend teams to integrate APIs, handle data flows, and deliver reliable frontend experiences.
- Implemented UI improvements, performance optimizations, reusable components, and responsive interfaces across web applications.
- Adept in diagnostic testing and troubleshooting for both web and mobile platforms.
- Successfully identified, diagnosed, and fixed application issues, including broken links, typographical errors, formatting problems, UI issues, and functional bugs.
- Ensured proper delivery timelines for tasks and coordinated with team members to achieve on-time releases.
